MEET YOUR CHIEF OF STAFF AGENT

Your Emotional Intelligence Onboarding — Microsoft Edition

A simple guide to help your AI Chief of Staff understand you, support you, and partner with you.

This is not about data. This is about you: how you think, how you work, and how you want to grow.

Your agent learns who you are based on what you share here.

This Soul Code is the **core document** which will capture your preferences, who you are, your aspirations.

We recommend taking the time to complete it manually. However, if you prefer to use Copilot to draft responses automatically for your review, please refer to the prompt provided in Part 1.

COPY-READY PROMPT

Context

I am updating a multi-section document that contains questions about me, my background, leadership, and impact. The document already contains factual information about my experience, roles, and work.

Execution Instructions (Critical)

1. First, generate complete answers for ALL questions.
2. Only after ALL answers are completed, create the Word document in a single step.
3. Do NOT generate partial outputs or drafts.
4. Do NOT call any tools or generate the file until all content is complete.

Source of Truth (Strict)

Use **only** the section headers and question text exactly as provided below.

Refer to all my emails, documents I have authored, teams messages and any other sources where you can find information related to myself.

Do not add, remove, rename, or reorder sections or questions.

Do **not** invent roles, achievements, scope, or experiences. For reflective or personal questions (e.g., preferences, emotional patterns, work style), you may infer based on existing documents and communication patterns, but must stay consistent with known information.

Response Scope Rules

Treat **each question as a standalone prompt**. Each answer must fully stand on its own and should not depend on context from other questions.

Answer **only the question directly above your response**.

Do **not** reference, summarize, compare, or connect answers across other questions or sections.

Avoid repeating identical phrasing. It is acceptable to reuse core themes or facts, but each answer must provide a distinct perspective focused on the question.

Writing Instructions

For **each question**, do the following:

- Target 5–10 sentences per question. If needed, keep between 4–8 sentences to maintain clarity and avoid redundancy.
- Write in the **first person (“I”)**.
- Focus only on content relevant to **that specific question**.
- Highlight my experience, strengths, leadership style, and impact **only as they relate to that question**.
- Maintain a consistent, professional, and authentic voice.

Structure & Formatting Rules

Preserve all original section titles and question text exactly as written.

Do not add introductions, summaries, conclusions, or section-level overviews.

Place the answer immediately below each question, separated by a single blank line.

Format cleanly for Microsoft Word (headings, spacing, and paragraph breaks only).

Document Creation

Final output must be a single Word (.docx) document

Insert the fully written responses under each question.

Do not include explanations in chat.

Do not return partial drafts. If generation fails, retry internally until complete.

You **MUST** answer ALL questions in the document. Partial completion is not acceptable.

Output Rules

Provide only the completed Word document.

Do not explain your approach or summarize your work in chat.
